**30% wool 70% acrylic**

Basic yarn from merino wool and acrylic characterized by elasticity, wear resistance and excellent heat shielding properties, ideal for creating products for sports and for active winter rest

**12% mohair 16% wool  
60% acrylic 12% nylon**

Mix yarn with Italian mohair, voluminous, soft and warm. Thanks to the used raw materials and special trimming, mohair does not prick and keep warm even in severe frost.

## Particularity of the compositions of the used yarns:

contain merino wool

contain the cashmere

contain alpaca's wool

contain the mohair

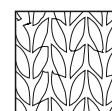

contain the angora

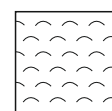

contain the cotton

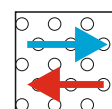

## Warming type

knitted lining

fleece

membrane fleece

## Country of origin of the yarn:

Italy

## Environmental friendliness

The Global Recycled Standard is an international, voluntary, full product standard that sets requirements for third-party certification of

Identification and traceability of the recycled content in textile along the entire chain of custody  
 Environmental requirements  
 Social responsibilities according to the ILO conventions  
 Define and uphold restrictions in the use of chemicals

Recycling Declaration Standard (RSC).  
 RCS is designed to confirm the presence and quantity of recyclable materials in the final product.  
 Also, the sign is used for correct and honest communication with consumers.

## Technology

THERMOCOOL is a yarn with intelligent fiber cross-section, it provides cooling evaporation or thermal barrier in accordance with the needs of the user. Yarn is a unique blend of fibers with a hollow core and directional fibers that provide significantly more thermoregulation compared to conventional yarns.
